Graduate Building Services Engineer, United Kingdom

Company profile

Industrial Design Associates is a dynamic and growing international engineering consultancy that specialises in the fields of design, due diligence and enhanced testing and commissioning management of mechanical and electrical building services.

Our focus business sectors include commercial interiors and mission critical facilities such as data centres. We have an exceptionally strong client list consisting of blue-chip organisations in the IT, technology, financial and industrial sectors that operate globally.

Founded in 2003, we currently have offices in Hong Kong, Shanghai, Beijing, Singapore, Mumbai, Bangalore and Pune. As part of our rapid expansion plans and following recent trends in our core business sectors, we have recently established an office in the United Kingdom, with a view to servicing the growing markets in the UK and Europe. As such, our rapid growth strategy will provide the successful candidate with excellent opportunities for professional development and career progression.

The primary office address will be in London, however we operate with a flexible remote working policy split between working from home, co-working office space and site, which can be agreed with the successful candidate as appropriate based on your geographical location.

We are looking for recently graduated building services engineers to join our growing team in the United Kingdom, to work on projects in the UK and across Europe.

This role refers not only to Graduate students but also undergraduates who are on their final year.

The opportunity can be available for summer placement as well.

Role Responsibilities

- Initially working under supervision of a senior engineer on projects involving mission critical facilities such as data centres
- The role involves a significant amount of site-based working, as well as occasional travel outside of the UK
- Projects may involve Design, Testing & Commissioning or a combination of both
- Maintain good relationships and communication with colleagues, Clients and other stakeholders
- Maintain good technical knowledge of the industry and relevant M&E design and industry standards

Qualifications & Experience

- Recently graduated or about to graduate with a Degree in Mechanical Engineering, Electrical Engineering or Building Services Engineering
- Motivated, flexible, and keen to learn
- Willingness to travel abroad
- Computer literate and have experience of industry design software such as AutoCAD, Revit BIM, CFD, AMTECH etc.
- Good people skills and time management skills
- Good written and spoken English skills are essential, additional European language skills will be beneficial
- Our preference is to employ candidates currently based in the UK, however, overseas candidates with the right skills and work experience will be considered.

Job Types: Full-time, Permanent

Benefits

- Competitive salary commensurate with experience
- Reward and recognition scheme
- Flexible remote working arrangements
- Contributory pension scheme
- Professional membership subscriptions
- Tailored career and growth mentoring
- Excellent travel opportunities

Application procedures

If you meet the descriptions as mentioned above, we would be pleased to hear from you. Candidates with some, but not all, of the above requirements will still be considered. IDA are an equal opportunities employer, we value diversity and recruit solely based on suitable experience and technical merit.

Please email CV and expected remuneration directly to hr@idai.com.hk
